BIOGRAPHY

Renowned guitarist Steve Stine started playing at age 13 and attended college at age 17 (graduated early from high school) studying Music Performance at Moorhead State University in Minnesota.

His love of teaching began early (age 17), and this celebrated educator and private lesson guru has been teaching lessons in various forms ever since (private, group, online, guitar courses, etc.). Stine was a Montessori Music Instructor for over 15 years. He continued as Professor of Modern Music Studies at North Dakota State University in Fargo for 4 years.

An active performance career began at age 23 that took Stine on celebrated world tours throughout the US, Canada, and Europe and flavored his teaching with a stronger sense of the music business and myriad genres of music.
