

**"Jealous are here to save the world from boredom"....**

If you're sick of listening to vacant game show pop stars, and tired of rock bands with lots of tattoo's but no songs, then **Jealous** are for you! Hailing from **Manchester UK**, home to The Stone Roses & Oasis **Jealous** are a throwback to an era when great Rock bands wrote great songs! With a sound that fuses Kasabian & The Beatles as easily as it mixes The Stones & The Velvets, **Jealous** are not just making up the numbers.

**Jealous** are back in the studio with the hot production team of Martin Coogan (mock turtles) & Yves Altana (The Chameleons). They are recording an Album featuring Denise Johnson (primal scream) which follows up the critically acclaimed "Stardust Ep" released late 2009! Here are a band who can offer today's generation, the kind of quality Rock n Roll that sits in the top 10, as easily as it sells out venue's up & down the country...
